

**Instruction:-**

1. As the drawings show (four doors open to either side only).
2. The width of each glass door size should be less than 800mm
3. Panels Width/Height must be Calculated as per formula given below.
4. Above Gaps shown in elevation must be maintain during the installations. ALREADY INCLUDED IN FORMULA DO NOT DEDUCT SEPARATELY.
5. H= CLEAR HEIGHT FROM TOP OF TRACK TO FLOOR LEVEL .
6.  $0.5W$  = Half of Clear width at site

**Calculation:-**

1. Panel "A" =  $\frac{0.5W-44}{4} -17$
2. Panel "B" =  $\frac{0.5W-44}{4}$
3. Panel "C" =  $\frac{0.5W-44}{4} +45$
4. Panel Height "H2" = H-60mm
